

Stud welder, especially for us with use with weld heads controlled by welding robots

Veröffentlichungsnr. (Sek.) DE19828986
Veröffentlichungsdatum : 1999-12-30
Erfinder : CITRICH ULRICH (DE); MADSAK JUERGEN (DE); EBERT WOLFGANG (US)
Anmelder : TRW NELSON BOLZENSCHWEISSTECHN (DE)
Originalnummer : DE19828986
Anmeldenummer : DE19981028986 19980629
Prioritätsnummer : DE19981028986 19980629
Klassifikation IPK : B23K9/20; B23K9/10
Klassifikation EK : B23K9/10A3C, B23K9/20
Korrespondierende Patentschriften EP1091823 (WO0000319), B1, WO0000319

Zusammenfassung

The stud welder has a central stud welding arrangement (3) with a weld output (17), a control connection (23) and at least one external control unit (5) connected to the weld output at its weld input and to the control connection with its control connection. The control unit has at least one weld output (17) connected to a stud welding head (7) and at least one controllable switch (29) connecting the control unit's weld input to a weld output.
